THE EXISTING PROJECT

The existing project provides for an entrance channel 40 feet deep and 400 feet wide across the outer bar to station 0-10; thence, with dimensions reducing gradually, a channel 30 feet deep and 300 feet wide beginning at mile 0.0 to a turning basin 30 feet deep, 900 to 1200 feet wide and 1400 feet long at mile 2.0 at McLean Point; thence a channel 18 feet deep and 200 feet wide beginning at mile 2.4 upstream to mile 4.4 at Yaquina.

NOTES:

Horizontal Coordinate System:
North American Datum of 1983 (NAD83-2011), projected to the State Plane Coordinate System (SPCS), Oregon North Zone. Distance units in U.S. Survey Feet.

Vertical Datum:
Soundings are shown in feet and indicate depths below Mean Lower Low Water 1983-2001. MLLW is 0.77 feet below the North American Vertical Datum (NAVD 88) at Idaho Point, 0.78 feet at Sawyer's Landing.

River mileage conforms to the River Mile Index of the Hydrology and Hydraulics Committee, Pacific Northwest River Basins Commission, June 1968.

The information depicted on this map represents the results of a survey conducted on the date indicated and can only be considered to represent the general channel conditions existing at that time and is in support of channel maintenance only.
